# Turbine Pumps

PASCO · MOSES LAKE · ROYAL CITY · YAKIMA · GEORGE · OTHELLO · BASIN CITY · SUNNYSIDE

Water is the lifeblood of agricultural production. Our goal is to supply you with the equipment, technology, and design expertise to make the best use of that water— to improve your yields, efficiency, and bottom line.

## LEADER IN DESIGN & INSTALLATION

- Expert design (all sizes to 2000 feet deep)
- Complete line of sales (Pump, Column, Tube, Shaft, and Motor)
- Full service repair
- Our own machine pump shop (repairs pumps up to 54 inches)
- Expert installation crew
- Camera inspections
- Well testing

We have access to the product lines of numerous pump manufacturers, allowing us to more easily find one to match your needs. You can rest assured that a Lad Irrigation pump station will give you the best available efficiency and value. With our own supply and machine shop, Lad Irrigation is your one-stop-shop for deep well turbine pump support.

## OUR PROCESS

From Start to Finish

- 1 Consultation**  
Meet with our experienced team to discuss and plan your project.
- 2 Design**  
Our designers with years of experience will design your pump system up to 2,000 feet deep.
- 3 Installation**  
Our experts will take your design to completion with installation, start to finish.
- 4 Repair**  
With our own machine shop, repairs are easily taken care of by our team.
- 5 Inspection & Testing**  
Our experts are available to inspect and test your deep well turbine pump system as needed.
