Pump Stations

PASCO - MOSES LAKE - ROYAL CITY - YAKIMA - GEORGE - OTHELLO - BASIN CITY - SUNNYSIDE

An efficient and responsive pump is the heart of an effective irrigation system. Whether you pump from a deep well, canal, or pond, we will design a pump station for your specific application and hydraulic conditions. We construct all pump stations to the highest standards of build quality, functionality, and electrical safety—all to provide reliable operation well into the future.

Our Services

- Expert design team
- Centrifugal
- Turbine pumps (short set & deep set)
- Filtration
- VFD design, installation, and startup (including programming)
- Full programming of parameters, including pressure control, pump/pipeline protection, multiple-pump lead/lag operation, and more
